

2018 Series Final SPP Economic Generation and Load Review

SPP Staff has posted the final economic parameters for generation and load data utilized in SPP economic studies, including the 2019 ITP. Please review the generation and load data workbooks, and provide any corrections by **Friday, January 19, 2018**. Note that these adjustments, if applicable, will not be reflected in Pass 4 of the 2019 ITP Powerflow models.

These files can be found on [GlobalScape](#) under “ITP (CEII, RSD) → ITP → Non-Competitive” in the “License_NDA” folder and on [TrueShare](#) under “SPP Modeling → 2018 Series → Economic Model Data” in the “Final” folder.

SPP Staff will be soliciting the ESWG and TWG for final approval of the 2018 series SPP economic generation and load data via email on January 22, 2018.

The unit ownerships provided in the “Ownership” tab of the Generation Review workbook **are not** reflective of the motion approved in the January 11th ESWG meeting regarding ESWG Action Item 189. Please note that SPP staff has included preliminary firm service amounts for your review. At this time, SPP Staff is not seeking approval of the firm service amounts.

Information for obtaining the 2018 Series SPP Economic Generation and Load Data

In order to obtain access to these documents in [GlobalScape](#) or [TrueShare](#), stakeholders must provide SPP with a signed [confidentiality agreement](#). Instructions can be obtained by clicking on the link. Please submit these forms via [RMS](#) through the “Request Globalscape Access” or “Request TrueShare Access” Quick Pick. After the executed confidentiality agreement is received, an account will be created for the requester on [GlobalScape](#) or [TrueShare](#). An email with instructions for logging in will be sent to the requester. For those that already have a [GlobalScape](#) or [TrueShare](#) account, no additional action is necessary.

As a reminder, instructions for requesting access to the model information can be found on the SPP website [here](#).
