

## 2018 ITPNT Updated Draft Project List

The updated draft list of projects and associated needs solved by each project for the 2018 ITPNT has been posted to [GlobalScape](#). **SPP staff would appreciate any stakeholder feedback regarding this draft project list by Friday, April 13, 2018, via the SPP [Request Management System](#) (RMS), using the “ITP-Data Submission” quick pick.** SPP staff will evaluate any feedback received to inform the first draft portfolio of the 2018 ITPNT that will be presented and discussed at the Engineering Planning Summit being held Thursday, May 3, 2018 at the SPP Corporate Offices in Little Rock.

Prior to this posting, SPP staff reviewed the proposed projects in the 2018 ITPNT and made a preliminary determination, based upon the information available, of whether each project met the requirements to be a Competitive Upgrade in Attachment Y, Section I (1). As a result of this determination, cost estimates were requested of incumbent transmission owners and SPP’s 3<sup>rd</sup> party cost estimator. These estimates have a deadline of Friday, April 13, 2018.

The updated draft project list includes projects needed to satisfy the posted needs for the study, including those projects driven by the 2019 and 2022 Scenario 5 Summer models as well as alternate projects. You will note at the bottom of the project list a legend has been included to identify new, updated, or removed projects. Projects needed to meet Scenario 5 Summer needs have been identified within the project list, and will require further evaluation for additional merit prior to receiving Board approval for an NTC. The details of the additional evaluation will be discussed with the TWG and other appropriate stakeholder groups before being approved independently by the SPP Board of Directors as documented in the 2018 ITPNT Scope.
