

2021 ITP Short-Circuit Model Information - Pass 2

- **Action Required**

SPP staff is requesting feedback on the 2021 ITP Short-Circuit models – Pass 2. The models are being built using PSS®E version 34.

As a reminder, a year 2 summer peak model will be used for the 2021 ITP short-circuit assessment in consideration of NERC Standard TPL-001-4. ITP needs will be identified from this Short-Circuit model.

The 2020 series MDWG and 2021 ITP models are being built in parallel; however, the models will be posted separately. Please refer to the model build schedule located on the SPP corporate website under the MDWG page ([2020 Series MDWG Powerflow and Short-Circuit Model Build](#)) for deadlines and milestones.

- **Entities Required to Provide Feedback:**

All interested stakeholders, primarily TWG and MDWG stakeholders

- Data Submitters should review the models to ensure that all submitted updates were implemented correctly. SPP staff should be notified of any discrepancies in a timely fashion.
- If there are any facility exceptions that need to be considered in the exceptions file, please provide updates.
- DocuCheck provides a list of values that are outside of tolerance or are in error, please review and provide updates.
- If there are updates to the list of facilities that should not be online for the max fault scenario, please provide updates for that file.
- Please submit MOD updates through [Model on Demand \(MOD\)](#); any questions or feedback should be submitted through the [SPP Request Management System \(RMS\)](#).

- **Due Date and Method of Submittal**

Please provide model updates by **Friday, February 7, 2020** through **MOD**. For any questions or feedback, please submit those by **Friday, February 7, 2020** through **RMS** under the “ITP-Data Submissions” Quick Pick.

- **Changes from Last Pass**
