AGENDA ITEM 2 – CURTAILMENT METHODOLOGY DRAFT

The working group continued to discuss the draft curtailment methodology. This document is a description of the existing process for educational purposes.

Jim Price moved to approve and Robin Chung second seconded the motion. No opposition was stated. The document is considered approved and will be posted on the ECCWG page on www.spp.org, under the Reference Document folder. Next steps will be to discuss adding a link to ECC to point users to its existence.

AGENDA ITEM 3 – ALTERNATE ACTIONS CHANGE ORDER

Jim Price gave the group the background for the Alternative Actions Change Order proposal. Several attendees had further questions regarding equity of BAs choosing tags versus off path tag entities. The group took an action item to continue reviewing the proposed CO, as well as a deeper discussion on this topic hosted by the UFC. Ashley Stringer (SPP) will send out a doodle poll to schedule a meeting to discuss, prior to the next joint meeting in March.

AGENDA ITEM 4 – CRITICAL DEVICE ALARMING UPDATE

Dede Subakti (RC West) submitted the Change Order request to OATI via websupport. Subakti asked Carlos Gonzalez-Perez (OATI) to verify it was visible. This Change Order is considered in progress.

AGENDA ITEM 5 – 95% MESSAGING (CO UPDATE)

OATI recently sent the final contract out to the participating RCs. This request was previously approved at the WIRCEC. The RCs are reviewing the final messaging language. Once approved, this should be implement in ECC within a couple of months. The group will need to discuss how to roll out information to the RCs and BAs to let them know the message is going to change.

Raj Hundal (PWX) had concerns on removing the 95% language. More background on this issue can be found in the May 2020 meeting minutes. An action item was given for the UFC to continue discussing if an actual SOL limit can be added to the message in the future.
