

Appendix E Network and Commercial Model Update Timing

The timelines in Appendix E identify a minimum update duration for requested changes. Some updates will require longer lead times and coordination with SPP staff. Entities or Attributes being utilized in an on-going TCR market may not be modified or terminated until the end of that TCR market. Section 6.6 outlines the additional requirements to meet TCR timelines.

Exhibit E-1 lists the update durations required to modify, terminate, or add attributes for each registration type.
