

## 2022 ITP Economic Generation and Load Reviews – Final Approval

- **Action Required**

The 2022 Integrated Transmission Planning Assessment (ITP) Generation and Load Review workbooks have been posted. SPP Staff is requesting review of generation parameters and load data utilized in the 2022 ITP market models and the 20-Year Assessment market models. Stakeholder focus should be reviewing the Generation and Load Review workbooks to ensure stakeholder edits and ESWG approved Future assumptions have been incorporated correctly into the posted Generation and Load Review workbooks. Late data submissions will be considered under [ITP Manual](#) Section 10.3.

Model data updates may occur after TWG approves the 2022 ITP Initial Final Base Reliability (BR) per the ITP Manual Section 10.3 process. Applicable 2022 ITP BR Powerflow updates that are under TWG purview will be incorporated into the 2022 ITP Generation and Load Review workbooks without seeking further ESWG approval of the 2022 ITP Generation and Load Review workbooks.

**SPP staff will be requesting approval of the 2022 ITP Load and Generation Reviews from ESWG via email on March 17, 2021.**

- **Entities Required to Provide Feedback:**

All interested stakeholders, primarily ESWG, TWG, and MDWG members

- **Due Date and Method of Submittal**

Please review the posted files prior to **Wednesday, March 17, 2021**. If there are questions or concerns please submit them through [RMS](#) under the “ITP-Data Submissions” Quick Pick.

- **Notes for Final Pass**

Load Review: Load mapping changes since last pass are indicated by green highlighting in PSSE-PROMOD Load Mapping tab.

Generation Review: Additional modifications indicated by green highlighting have been made to the Fleet Power Purchase Agreements tab.
