

2022 ITP Site Repository Posting

- Action Required**

SPP staff requests that stakeholders review the 2022 ITP site repository and provide feedback. After stakeholder feedback is received and incorporated, this site repository will be used as a comprehensive list of sites for consideration in siting of units identified in the 2022 ITP resource expansion plan.

SPP staff highly encourages stakeholders to reference the [Instructions] tab within the workbook and focus on reviewing the following with respect to their company:

- Completeness of potential sites for each technology included (if additional sites are necessary, please provide associated attributes)
- Potential sites for batteries or notification that these types of sites are not applicable
- Ranking of sites by technology indicating preference and/or feasibility (If you prefer to have 2021 ITP ranking as a starting point, these may be sent through RMS upon request)
- Interconnection feasibility at potential sites
- Feasibility of replacement capacity at sites with projected retirements

Other information is provided as reference, but if more accurate data is available, SPP staff will consider edits as they are provided. Some confidential attributes have been omitted from this posting, but SPP staff may use this data in the development of siting criteria and site assignments.
