### AGENDA ITEM 2 – CHANGE ORDER UPDATES

The group reviewed four outstanding Change Orders.

Critical mappings:

The group requested a quote from OATI regarding critical mappings. The ECC tool should be enhanced to alert the Western Interconnection Model Administrator (currently RC West) when critical devices lose its mapping such that it impacts shift factor calculation. OATI has provided a quote and the group is reviewing the proposal. A vote will take place at the next meeting with quorum. OATI did not expect a reduced price unless the scope of the CO was reduced.

95% Language:

The ECCWG and the RC Executive Committee previously approved the 95% Change Order. This change was implemented into the production environment on July 27, 2021. The group discussed a need to send out a notification to users that may be impacted by ECC releases. Kokou Agbassekou (CAISO) will consider ways to do this going forward and bring back ideas to the group. In the meantime, production releases will be emailed out to the ECCWG.

Competing Path:

OATI has provided a quote for this CO. The ECCWG will vote on this change at the next meeting with quorum.

Alternative Relief:

A proposed CO has been drafted and the group has asked CAISO to request a quote from OATI.

### **AGENDA ITEM 3 – FUTURE STATE DISCUSSION**

A joint meeting between UFC & ECCWG is currently being scheduled for the end of September. Members were asked to begin drafting any specific issues with UFMP or ECC leading up to that meeting.
