

2023 ITP Resource Plan - Phase 2 - Final Results

- **Action Required**

The 2023 Integrated Transmission Planning Assessment (ITP) Resource Plan - Phase 2 - Final Results workbook has been posted to [GlobalScape](#). SPP Staff will be seeking **approval** of the Resource Plan - Phase 2 from the ESWG during the regularly scheduled meeting on [May 5, 2022](#).

Feedback received and/or changes requested have been addressed with the applicable stakeholder and incorporated, as applicable. Based upon the feedback, the renewable allocation values have been adjusted. As noted below, the equivalent ELCC amounts were updated to reflect the existing nameplate value of resources modeled in the SPP region. The preliminary results only accounted for the existing "SPP pricing zone" owned resources. SPP staff incorporated two exception requests for AEPW and SPS. AEPW requested accreditation from Non-SPP ("SPP-Other") owned resources and SPS requested CC prototypes for conventional units.
