

Good afternoon stakeholders,

2023 ITP Base Reliability (BR) Powerflow Proposed Final Model Information

- **Note:** SPP has inadvertently only posted the models that include Node Breaker data. To address this, SPP is reposting additional models with the Node Breaker data removed. There are no differences between the model sets except the removal of the Node Breaker data. Please note that the models with the “_NB” suffix will include Node Breaker data and the models without “_NB” will exclude Node Breaker data, which differs from the original posting. The models that will be voted on for approval will **not** include Node Breaker data.
- **Due Date and Method of Submittal**
 - SPP staff will be requesting TWG approval of the updated final 2023 ITP BR Powerflow Proposed Final model information via email on **November 11, 2022.**
- **Changes from Last Pass**
 - Updates as listed in the posted 2023 ITP BR Model Update Matrix workbook
 - Includes set of models that has node breaker data removed
