

2024 ITP – Economic Generation and Load Review – Pass 2 Trial 1

- **Action Required**

SPP Staff is requesting a review of generation parameters and load data utilized in the 2024 ITP market models. Please submit all changes by Friday, **January 27, 2023**, through the SPP Request Management System ([RMS](#)) using the steps described in the Helpful Links and Access section.

This review is the second of two (2) passes to review the datasets. The projected generation and load review schedule are as follows:

Pass 1 – Trial 1: September 30 – October 14, 2022

Pass 2: January 13 – January 27, 2023

SPP staff will post the final pass of the 2024 ITP Load and Generation Reviews on March 24, 2023, and request email approval on March 31, 2023.

Reviewers should read the [Instructions] tabs in each workbook for background data, source information, and instructions on updating data.

Note: Powerflow information for Pass 2 – Trial 1 of the generation and load review originates from Pass 2 – Trial 1 of the 2024 ITP Base Reliability Powerflow models.

- **Entities Required to Provide Feedback**

All interested stakeholders, primarily TWG, ESWG, and MDAG stakeholders

- **Due Date and Method of Submittal**

Please provide updates by Friday, January 27, 2023, through [RMS](#), following the steps described in the Helpful Links and Access section.

- **Changes from Last Pass**

- Included staff and stakeholder adjustments received during Pass 1 Trial 1 feedback period
- Incorporated approved Resource Addition Requests
 - No waivers were received for this cycle

- **Notes**

- Curtailment Prices
 - Once Inflation Reduction Act implications are determined and set in 2024 ITP Scope, we will adjust curtailment prices accordingly in the Generation Review and populate it for the final posting
 - The curtailment tab will be left blank for this posting
- Retirements

- Please update future 1 and future 2 retirement dates to reflect the current integrated resource plans
