

2024 ITP – Economic Generation and Load Review – Final Pass Updated

- **Action Required**

No action is required. SPP Staff has posted the Economic Generation and Load Review workbooks that were approved by an ESWG email vote on Thursday, April 6, 2023.

Model data updates may occur after TWG approves the 2024 ITP Initial Final Base Reliability (BR) Powerflow Models in accordance with the ITP Manual Section 10.3 process. Applicable 2024 ITP BR Powerflow updates that are under TWG purview will be incorporated into the 2024 ITP Generation and Load Review workbooks without seeking further ESWG approval of the 2024 ITP Generation and Load Review workbooks. SPP will post updated workbooks with detailed changes.

- **Entities Required to Provide Feedback**

All interested stakeholders, primarily TWG, ESWG, and MDAG stakeholders

- **Due Date and Method of Submittal**

Please review the posted files. If there are questions or concerns, please submit them through [RMS](#) following the steps described in the Helpful Links and Access section.

- **Changes from Last Posting**

- AEPW
 - Max Capacity
