• **Action Required**

SPP staff is requesting stakeholder feedback on the 2026 ITP BR Powerflow models – Pass 1, and supplemental data posted today, as follows:

- Please verify topology is modeled appropriately
 - Please submit topology updates as PSS®E version 35.6 idev files through the [Model on Demand \(MOD\)](#); any questions or feedback should be submitted through the [SPP Request Management System \(RMS\)](#).
 - When submitting projects and profiles to MOD or post processing idevs, please use the following naming convention:
 - Prefix the project/profile name with your owner/area number underscore company name underscore XXXX OR company name underscore XXXX if you do not have an area/owner number. For example:
 - **Project name:** 525_WFEC_Midwest-Franklin_Rebuild.prj or Nextera_Add_GenX.prj
 - **Profile name:** 659_BEPC_2017MDAGP4-18S or Nextera_2017MDAGP4-18S
 - The file name should be separated by underscores instead of spaces (*e.g.*, 525_Patent_Gate.prj)
 - For NTC projects, include the UID or PID number at the end. For example, 659_Patent_Gate_UID300.prj or 659_Patent_Gate_UID300.idv

As a reminder, the following Base Reliability models will be used for the 2026 ITP:

- 2026 Base Reliability Summer, Fall, and Winter models
- 2027 Base Reliability Light Load, Spring, Summer, Fall, and Winter models
- 2030 Base Reliability Light Load, Summer Shoulder, and Winter models
- 2035 Base Reliability Summer and Winter

Please note the 2025 series MDAG and 2026 ITP models are **NOT** being built in parallel. SPP will build ITP BR models first and then build MDAG models from the completed ITP BR models. Please refer to the model build schedule located on the SPP corporate website under the MDAG page ([2025 Series MDAG / 2026 ITP Powerflow and Short Circuit Model Build](#)) for the different deadlines and milestones.
