AGENDA ITEM 5– WEIS BA RELIABILITY DISCUSSION

Steve Szablya (PSCO) presented on the reliability challenges faced by Balancing Authorities (BAs) in the WEIS and shared data illustrating the issues. Mike Mason (TSGT) stated PSCO’s recent OASIS notice, which requests entities to recover balance of load and generation within 10 minutes, will require submitting tighter economic range. The group appreciated Steve bringing this issue to the group, and agreed alternative solutions need to be investigated. Raleigh Mohr (SPP MMU) asked if factors like bad data and Market Participants not being supply adequate are exacerbating the issues the BAs are experiencing. Raleigh also asked if SPP is going to file update Tariff language to support BAs requesting a Market Hold. Brad Johnston (SPP) stated there are internal efforts focused on modifying governing document language, if needed, for WEIS Market Holds requested by a BA.

AGENDA ITEM 6 – JUNE 2024 WEIS MARKET REPORT

Antonio Barber (SPP) and Brad Pope (SPP) gave an overview of the monthly metrics. The group had concerns the reports could be skewing the results due to variability at different times of the

day. They requested SPP staff break down the forecast errors on an hourly basis, which could help in understanding how forecast accuracy fluctuates throughout the day and give a clearer picture of the performance of the forecasts.

Action Item: Antonio Barber (SPP) will explore alternate ways to present load forecast error on an hourly basis.

- Brad Johnston (SPP) provided a update on the effort to find a solution to limit URDs during start-up. SPP Staff is currently reviewing an option that would not require vendor assistance or governing language change. More information to be provided as details become available.
- Neil Lindgren (WAPA UGP) requested information on the patch to correct the unintended allocation of power balance on the BAs that was introduced when WR 38 was implemented. SPP Staff will bring an education session to the WMWG that will cover the issue and resolution at a later date.
- Neil Lindgren (WAPA UGP) requested the group explore the idea of creating a Task Force, that would have both merchant and reliability personnel, that focused on finding alternatives to issuing Market Holds in the WEIS.

Action Item: Explore the possibility of creating a Task Force, with merchant and Balancing Authority representation, focused on exploring coordination steps during reliability related scenarios.

Action Item: SPP Staff will present an education session on the modified method of allocating power balance MWs across the Balancing Authorities.
