

2026 ITP Resource Addition Request (RAR) and Waiver Form

- **Action Required**

SPP Staff is requesting information on prospective generation through the ITP Manual RAR and Waiver process via applications for the 2026 ITP study. If a resource has not already been identified in the 2026 ITP Generation Review, but meets inclusion criteria (see below), please submit a RAR and Waiver Application (including presentation) to SPP Staff via the [SPP Request Management System \(RMS\)](#) by **Friday, October 11, 2024**.

Generating Resource Inclusion Guidelines:

Waiver:

Generation resources and associated transmission service requests that have a high probability of going into service or obtaining an effective transmission service agreement can be included in the base reliability model although the requests have not fully completed the processes defined in Attachment V and Z1 of the SPP Tariff. Requirements for these resources are outlined in Section 2.1.1.1 of the [ITP Manual](#).

Generation resources not meeting the requirements in Section 2.1.1.1 of the ITP Manual can be submitted to the TWG for approval. The information the TWG will consider for inclusion in the reliability models is also outlined in Section 2.1.1.1 of the ITP Manual.

RAR:

Generation resources in the base reliability models will be included in the economic models, as appropriate. In addition to these resources, generation interconnection resources and associated network upgrades will be included if meeting all of the requirements listed in Section 2.2.1.4 in the ITP Manual. Refer to Section 2.2.1.4 in the ITP Manual regarding Resources identified by SPP as necessary to solve the base reliability model.

Generation resources not meeting the requirements in Section 2.2.1.4 in the ITP Manual can be submitted via a request for generation capacity to the ESWG, and TWG, if applicable, for consideration of approval on a case-by-case basis. The minimum information the TWG and ESWG will consider for inclusion in the economic models is also outlined in Section 2.2.1.4 in the ITP Manual.

Please note, it is the responsibility of the Waiver/Resource Addition Request submitter to provide and present the appropriate justification to the TWG and ESWG for approval during official meeting times. The TWG meeting will be held December 10-11, 2024, followed by the ESWG on December 12, 2024. Applications that the TWG does not approve may still be presented to the ESWG for inclusion in the 2026 ITP market models. Meeting materials will be due to SPP for staff and stakeholder review on October 11, 2024. The request may not be considered if a submitter provides an application but doesn't provide meeting materials.

- **Entities Required to Provide Feedback**

All interested stakeholders

- **Due Date and Method of Submittal**

Please provide updates by **Friday, October 11, 2024**, via the [SPP Request Management System \(RMS\)](#), using the "Submit Information" **Request Template**, "Integrated Transmission Planning (ITP)" **Subtype 1**, and "Data Submission" **Subtype 2**.

- **Changes from Last Pass**

N/A

- **File location in the [ITP Postings](#) folder**

This file will be posted on SPP.org under the [ITP Postings](#) folder. This will not be posted to GlobalScape.
